

My husband and I are subscribers of XM Radio. We dont see why you have to pick on this. We choice to subscribe to this service and dont think it is right of you to want to shut it done. The traffic and weather provides my husband with inportant information each day in his work. The service is much better than regular radio. Instead of picking on satellite radio and the services offered why dont you take the time to focus on people like Howard Stern and all the other trash that is on the radio.
